

## MEDICAL KIOSKS

Diginue's Medical Kiosks come in two models – **MDK501 & MDK5001**. **MDK501** comes with Lab Report dispensing. When the payment has already been made the patients can take printouts for the Lab Reports directly from these kiosks. Therefore, these kiosks come with a touch screen and A4 size printer for dispensing lab reports. **MDK5001** comes with Cash Acceptor, Card Reader, thermal printer & A4 size printer for payment & dispensing.

These KIOSKS accept payment through cash and card (credit/debit). Its user friendly and voice support in local languages can also be introduced as an added feature if required. **Daily / Monthly reports** can be generated as per the number of transactions.

**FEATURES:** - Can function in any environment • 24x7 operational • User friendly • Multiple functionality • Touch-screen interface • Self-Diagnostics • Multimedia & Dynamic Ads • Scalability • Secure Box – for collection
